

### Regular Dental Check-up & Scaling:

Traditionally dentists recommend a General Dental check-up and Scaling every six months or twice a year for addressing problems early and to maintain optimal oral health.

### Reasons Behind Creating New Modules:

Challenges we face: Sometimes urgent situations arise where we must act swiftly to relieve patients in need.

For example: Pregnant women with severe tooth aches and swelling seek immediate relief. Children and exam going students often come with same problems and they seem to be stressed & restless. These are very few examples. So we recognise the importance of raising awareness about oral health. Our clinic emphasizes preventive measures to ensure long term well being.

### Transition to three month check-up and scaling regime:

In our updated approach we propose transitioning from the standard six monthly check-up and scaling to Three Month General Check-up and scaling (with scaling if necessary) and it is completely free of cost. This accelerated schedule allows for better monitoring and timely intervention. Importantly ultrasonic instruments used for scaling ensure effective scaling without causing wear and tear.

### Free Dental Service:

When patients consistently follow the chosen module without deviation for five years, we offer free dental services such as consultation & fillings as a reward for your commitment for 3rd, 4th & 5th year as a token of appreciation for your consistency in continuation.

This programme is a mark of our commitment to our field of dentistry and solely for the betterment of our patients and wider community. Remember this programme is not about revenue generation; it is an awareness and preventive initiative. We are dedicated to promoting oral health and providing compassionate care.

### Module Overview

Module	Frequency	Benefit
Yearly twice general check-up and scaling	Every six months	Early deduction and prevention
Three month general check-up and scaling (if scaling is needed)	Transition after initial period Every three months	Enhanced monitoring and timely care Free of cost
Continuously For 5 years	Every three months (2 <sup>nd</sup> & 4 <sup>th</sup> visits are free in a year)	Free consultation & fillings in 3 <sup>rd</sup> 4 <sup>th</sup> & 5 <sup>th</sup> year.
